## **SECTION 1**

SUMMARY  
ANNUAL REPORT OF THE OPERATIONS SECRETARY  
TO THE  
ARKANSAS RIVER COMPACT ADMINISTRATION

November 1, 1993 to October 31, 1994

Winter storage began in John Martin Reservoir at 0001 hr, November 1, 1993. At that time the conservation pool was empty and the reservoir accounts contained 41,275.00 a.f. distributed as follows: 32,812.54 a.f. in Agreement Accounts and 8,462.46 a.f. in the Permanent Recreation Pool. Adjustment of Agreement accounts transferring excess water remaining in the Kansas transit loss account at the end of the 92-93 compact year into Kansas and Colorado storage accounts was accomplished on November 1, 1993. Winter storage ended at 2400 hr., March 31, 1994. During this period 62,111.50 a.f. was stored. Of this amount, 33,488.17 a.f. was stored in the conservation pool and 28,623.42 a.f. was stored under the winter storage program in Article III accounts. This water was allocated to various accounts as specified in the Operating Plan adopted by the Compact Administration on April 14, 1980.

Transfer of conservation pool water to accounts began at 0001 hr, April 1, 1994, at a rate of 1250 cfs. The conservation pool was emptied at 0726 hr, April 19. During the time that transfer was being accomplished 6,616.39 a.f. was stored under summer storage conditions. In addition, 10,959.29 a.f. of conservation storage occurred on May 11-18, 27,670.37 a.f. occurred on June 4-17, 2,789.47 a.f. occurred on August 14-15, and 4,034.41 a.f. occurred on August 31-September 2, 1994. This water was all transferred to accounts as provided for in the 1980 Operating Plan.

The Colorado Division of Wildlife again negotiated for the purchase of trans-mountain water this year. This water was moved downstream to the Permanent Recreation Pool in John Martin in June and July. The amount stored in the pool was 7,747.41 a.f.

A run to the State of Kansas was begun at 0900 hr, June 15, at a rate of 400 cfs. This run continued until 2019 hr, July 27, when the Kansas account was emptied. Credit for delivery to the state line was taken only for an amount equal to the release from the State of Kansas account.

Beginning on July 20, with prior approval of the Administration, 2,000 a.f. of trans-mountain project water was released from Pueblo Reservoir for the City of Lamar, Colorado. A transit loss was calculated and 1,399.65 af was stored in John Martin Reservoir for the City of Lamar. Releases to the City from this account began on July 25 and the account was dry by 1027 hr, August 17.

The residual contained in the transit loss account at the end of the 1994 Compact year proved to be one of the largest on record. At 2400 hours on October 31, 1994 the account contained 21,811.61 a.f. At the end of the 1993 year the account contained 13,847.08 a.f.

At the close of the Compact year, the reservoir accounts contained 65,254.67 a.f. This is about 24,000 a.f. more than on the same date last year.

SUMMARY  
ANNUAL REPORT OF THE OPERATIONS SECRETARY  
TO THE  
ARKANSAS RIVER COMPACT ADMINISTRATION

November 1, 1993 to October 31, 1994

The summary tables I-VIII and XIV reflect the status of the various accounts during the year. Tables IX-XIII describe releases that were made during the year. These tables are found in Section 3 of this report.

Section 4 of this report consists of daily accounting records by month for all accounts.

December 14, 1993

AGREEMENT

1. This Agreement will expire November 1, 1994, except that those provisions of Paragraph 5 regarding transfer of any excess water remaining in the Kansas transit loss account may be deferred pending further consideration.
2. Kansas and Colorado will cooperate in all release rates to secure the most efficient delivery of water to the Stateline and to Kansas water users.
3. Credit for delivery to Kansas will stop at the Stateline 7 days after the end of the run at John Martin Reservoir. No credit for over-delivery will be determined for a run that exceeds 100% of the Kansas account release.
  - 3a. In the event Kansas calls for a second run before the first run's 7 days have elapsed, then there will be a meeting between the Kansas Water Commissioner and the Colorado Division Engineer to establish the delivery.
4. When the daily average flow at the Stateline exceeds the demand, delivery will be credited at not to exceed 105% of the demand.
5. 35% of all "other water" will be transferred into Kansas transit loss account. In the event that water in Kansas transit loss account exceeds the transit loss at the end of the irrigation year, the excess balance will be transferred into the Kansas and Colorado storage accounts.

**Date:** November 10, 1994

**To:** Steve Witte

**From:** Steve Kastner *JK*

**Re:** Summary of DOW releases to John Martin Reservoir during 1994

Two releases of water were made to the Permanent Pool in John Martin Reservoir during the 1994 irrigation season by the Colorado Division of Wildlife (DOW). One release was from Meredith Reservoir and the other release was from Clear Creek and Turquoise Reservoirs.

The Meredith Reservoir release began on June 5 and ended on June 6, 1994. A total of 1008.45 acre-feet of Twin Lakes transmountain water, which the DOW purchased from the City of Colorado Springs, was released. This release produced 940.94 acre-feet of water in John Martin Reservoir.

Beginning on June 8 and ending on June 28, 1994 transmountain water, which the DOW purchased from the Pueblo Board of Water Works, was released from both Clear Creek and Turquoise Reservoirs to John Martin Reservoir. This release was quite complex in it's operation but in summary 7277.82 acre-feet of water was released (as measured at Pueblo Reservoir). This release amount netted 6806.47 acre-feet of water in John Martin Reservoir.

June 13, 1994

Mr. Steven J. Witte  
Division Engineer  
Division of Water Resources  
P.O. Box 5728  
Pueblo, CO 81003

Dear Mr. Witte:

Please accept this as written notification of the City's intent to utilize John Martin Reservoir to regulate release of Fry-Ark water for municipal use.

The rate of release from Pueblo Reservoir to John Martin is estimated to be 400 cubic feet per second. The release rate from John Martin Reservoir to the Fort Bent Ditch will be approximately twenty (20) cubic feet per second. The projected date for initiation of release is July 18, 1994, to continue through August 13, 1994. Total volume of project water we are requesting is 2,000 acre feet.

If you have any questions, please contact me at telephone (719) 336-2002.

Thank you for your assistance.

Sincerely,

*Dannie McMillan*  
Dannie McMillan

Dear Compact Administration Members:

I received the enclosed notification of the City of Lamar's intent to utilize John Martin Reservoir to regulate releases of Frying Pan-Arkansas Project water for municipal use. As per the Administration's instructions to me at the December 12, 1989 meeting, I am forwarding this to the Administration members for your consideration. It is my understanding that the City and the Operations Secretary are to consider the Administration's approval to have been granted unless objection is received from either or both states comprising the Administration, by the Operations Secretary within a three-week notice period. Whereas, I received this notice in my office on June 15, 1994, I will expect any objection to be filed with me by close of business July 6, 1994, otherwise thereafter I will allow the proposed operation to commence.

Thank you for your consideration of this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven J. Witte".

NOTE: "Credited Flow" was determined only at such times when actual releases were being made from John Martin Reservoir and for a period of up to seven days afterward to allow for run down; but was limited to 105% of Kansas's demand each day and 100% of the total account release ordered. Only one release lasting 43 days was made on Kansas's demand during the year.

The stateline flows are based on USGS provisional data.

- \* These figures include transmountain and reusable waters passed through John Martin Reservoir and delivered to the stateline, see footnote Table XIII.
- \*\* These figures determined as per footnote in Table XIII.

Note: "Credited Flow" was determined only at such times when actual releases were being made from John Martin Reservoir and for a period of up to seven days afterward to allow for rundown; but was limited to 105% of Kansas's demand each day and 100% of the total account release ordered. Only one release lasting 43 days was made on Kansas's demand during the year.

The stateline flows are based on USGS provisional data.

\* These values include transmountain and reusable waters passed through John Martin Reservoir and delivered to the stateline pursuant to instructions of Colorado well owner associations:

| Date            | LAWMA<br>(cfs) | AGUA<br>(cfs) | Combined<br>(cfs) |

Pursuant to a resolution adopted by the Arkansas River Compact Administration on December 10, 1996, the following footnotes are to be inserted below Tables XI, XII, and XIII of the Annual Report of the Operations Secretary Concerning the Operation of John Martin Reservoir – 1994 and, Tables XI, XII, and XIII A-F of the Annual Report of the Operations Secretary Concerning the Operation of John Martin Reservoir – 1996:

1. The State of Kansas reserves its objections (a) to the manner in which Kansas release water and Colorado augmentation water have been accounted at the state line, (b) to the usability of the augmentation deliveries, and (c) the acceptability of the sources of augmentation water.
2. The State of Colorado acknowledges the Kansas objections and agrees to work toward an accounting acceptable to Kansas in this area.
3. Acceptance of this report is without prejudice for either state to endorse a new or different accounting procedure in future years.
